ABSTRACT OF THE DISCLOSURE

A system for accessing servers of acceptable domains and acceptable URLs by a computer of a user on the Internet. The system includes a web browser configured to have contained therewithin the acceptable domains and a database listing at least one of the acceptable URLs. The web browser has a requested URL enterable therein by the user, either directly or by way of a homepage thereof, and once entered, determines if the requested URL is an acceptable domain, and if so, accesses the server associated with the requested URL, and if not, determines if the requested URL is listed in the database, and if so, accesses the server associated with the requested URL, and if not, displays on the computer of the user a "requested URL is not accessible" message.
